

WOODHOUSE
SHOW AND EVENT SPECIALISTS

Trackway & Walkways

manufactured from high density recycled polythene materials, Quicktrack is the unique, lightweight yet sturdy ground protection system from Woodhouse. Each 3m x 1m panel is tough, durable and water resistant and weighs just over 50kgs. The surface is non-slip and can easily cope with heavy footfall and vehicle movements.

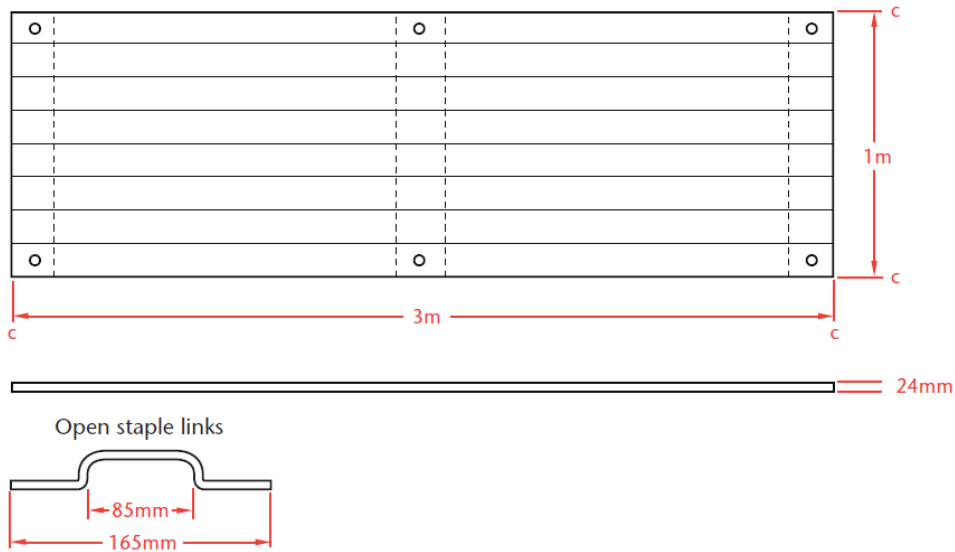

Our temporary roadways and pedestrian walkways enable easy access over turf and rough terrain and are suitable for supporting all manner of commercial event traffic.

When our trackway is installed and dismantled by experienced Woodhouse teams you can be confident that the **MUTAmarq** best practice is followed every step of the way, from pre-installation ground assessment through to post-event site clearance.

See overleaf for our Technical Specification

Overall Dimensions

Whatever the conditions on the day we always recommend installation of Trackway before bad weather sets in for maximum benefit.

Features

Mat dimensions 1m wide x 3m long

Mat weight 50kg (111lbs approx)

Mat construction 100% recycled high density polyethylene

Heavy duty recycled hdpe extrusions Threaded with steel bars and linked with staple links

Benefits
