

## Trackways & Walkways

### Quicktrack

Manufactured from high density recycled polythene materials, Quicktrack is our unique, lightweight yet sturdy, ground protection system. Each 3m x 1m panel is tough, durable and water resistant, weighing just over 50kgs. The surface is non-slip and can easily cope with heavy footfall and light-vehicle movements, providing easy access over turf and rough terrain.

- The panels are threaded with steel bars and linked with open staple links.
- Unique tongue and grooved design reduces mud squeeze through.
- Rot resistant.
- Flexible 1.45mm per metre expansion per 10°C change in temperature.

### Temporary Horse Walks and Stable Mats

We can provide Rubber Walk Ways and Stable Mats to prevent damage to the ground and to provide a safer surface - especially during periods of bad weather.

Assembled from Kraiburg 24mm interlocking stable mats, our Horse Walks provide sure footing for horses and ponies. The mats measure 1.70 metres x 1.25 metres, and can be laid in a variety of configurations.

All of our temporary roadways and walkways are installed by our dedicated and experienced on-site installation teams ensuring that MUTA Best Practice Industry Standards are followed every time.
