

## Temporary Shower Block

### 3 x 3m Showers

The covered 3 x 3m showers with rot-proof hdpe partitions (of the same specification as the Quickstables) are set up as per the Single Row Stables with white or green PVC roofs covering the 3 sided wall structure using our tensioned roof system.

- A 15m supply coiled hose fitting is provided with a 6 spray action metal shower/hose head with rubber handle.
- A tie up point is provided on the rear shower wall to secure the horse.

- We can also install a non-slip floor using Kraiburg (or similar) 24mm interlocking stable mat.
- We also have available optional stable fronts for individual showers – fully open, part open or solid front with door if required.
